INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <div style="text-align: center;">RIVER</div>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="width: 33%;">Date From:</td> <td style="width: 33%;">8/7/2021</td> <td style="width: 33%;">Date To:</td> <td style="width: 33%;">8/8/2021</td> </tr> <tr> <td>Time From:</td> <td>0700</td> <td>Time To:</td> <td>0700</td> </tr> </table>	Date From:	8/7/2021	Date To:	8/8/2021	Time From:	0700	Time To:	0700
Date From:	8/7/2021	Date To:	8/8/2021						
Time From:	0700	Time To:	0700						

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Maintain fiscal accountability and keep costs commensurate with values at risk.

Control Objectives

- Keep the fire in the established perimeter

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

In the COVID-19 environment, high density populations or large groups are particularly at risk. To help protect yourself, your family and to ensure all employees return home safely, make sure to practice social distancing.

Enhanced hygiene (especially handwashing), PPE & monitoring practices help limit the infection rate of first responders.

Fire Weather Planning Forecast for Interior Northern California National Weather Service Sacramento CA 226 PM PDT Fri Aug 6 2021 ...Locally breezy winds this weekend...
.DISCUSSION... Northerly winds continue today before shifting back to the onshore south to westerly flow this weekend. Locally breezy afternoon and evening winds expected this weekend, especially over the higher terrain and in wind prone gaps and canyons. This combined with continued low daytime humidity could produce locally elevated fire weather concerns. Moderate to poor overnight humidity recoveries expected in the foothills and higher elevations.

Follow COVID guidelines to protect yourself, your crew, and your family. Practice social distancing when possible and wash your hands regularly. If you experience flu like symptoms, isolate yourself and report your status via the chain of command.

HEADS UP! Look out for SNAGS when working around burned trees. Evaluate all damaged trees before working under or around them.

Beware of the risks of fatigue and complacency. Document your crew safety briefing and rest periods.

Ensure radios are programmed for today's communications plan (ICS 205) and that crews are trained in proper communications procedures.

Stay hydrated! Time to think = time to drink.

Remain mindful of what is going on around you. LCES! Utilize the P-A-C-E method to plan. Primary-Alternate-Contingency-Emergency planning.

Maintain situational awareness. Look up, Look down, Look all around.

Beware of extreme fire behavior due to low live and dead fuel moistures, persistent drought, and elevated fire danger rating values.

Beware of the signs of heat stress and illness.

Know the fire and weather conditions, the action plan, and your role in it.

Steep and rugged terrain with critically dry and receptive fuel beds are present throughout the incident. Slow down when driving on loose gravel and blind curves, drive defensively.

Suppression Repair Message

The following are repair tasks that crews can conduct as available on the fireline.

General Repair Items

- Report any damage to property including gates, fences, watercourses, culverts or any other damage caused by suppression activities.
- Remove all trash generated by the incident.

Handlines

- Install waterbreaks when necessary to prevent erosion.
- Handlines along the contour, on ridge tops or other flat areas will not require waterbreaks if the line will not concentrate water runoff.
- Remove all trash from the lines so it can be backhauled.

Dozer Lines

- Move hose lines to one side of the line so that it can be accessed and repaired by equipment if necessary.
- Install waterbreaks as feasible focusing on very steep areas first.

Roads

- Remove berms from outside of roads.
- Clean Culvert inlets of debris from suppression activities.
- Clean inside ditches of debris from suppression activities.

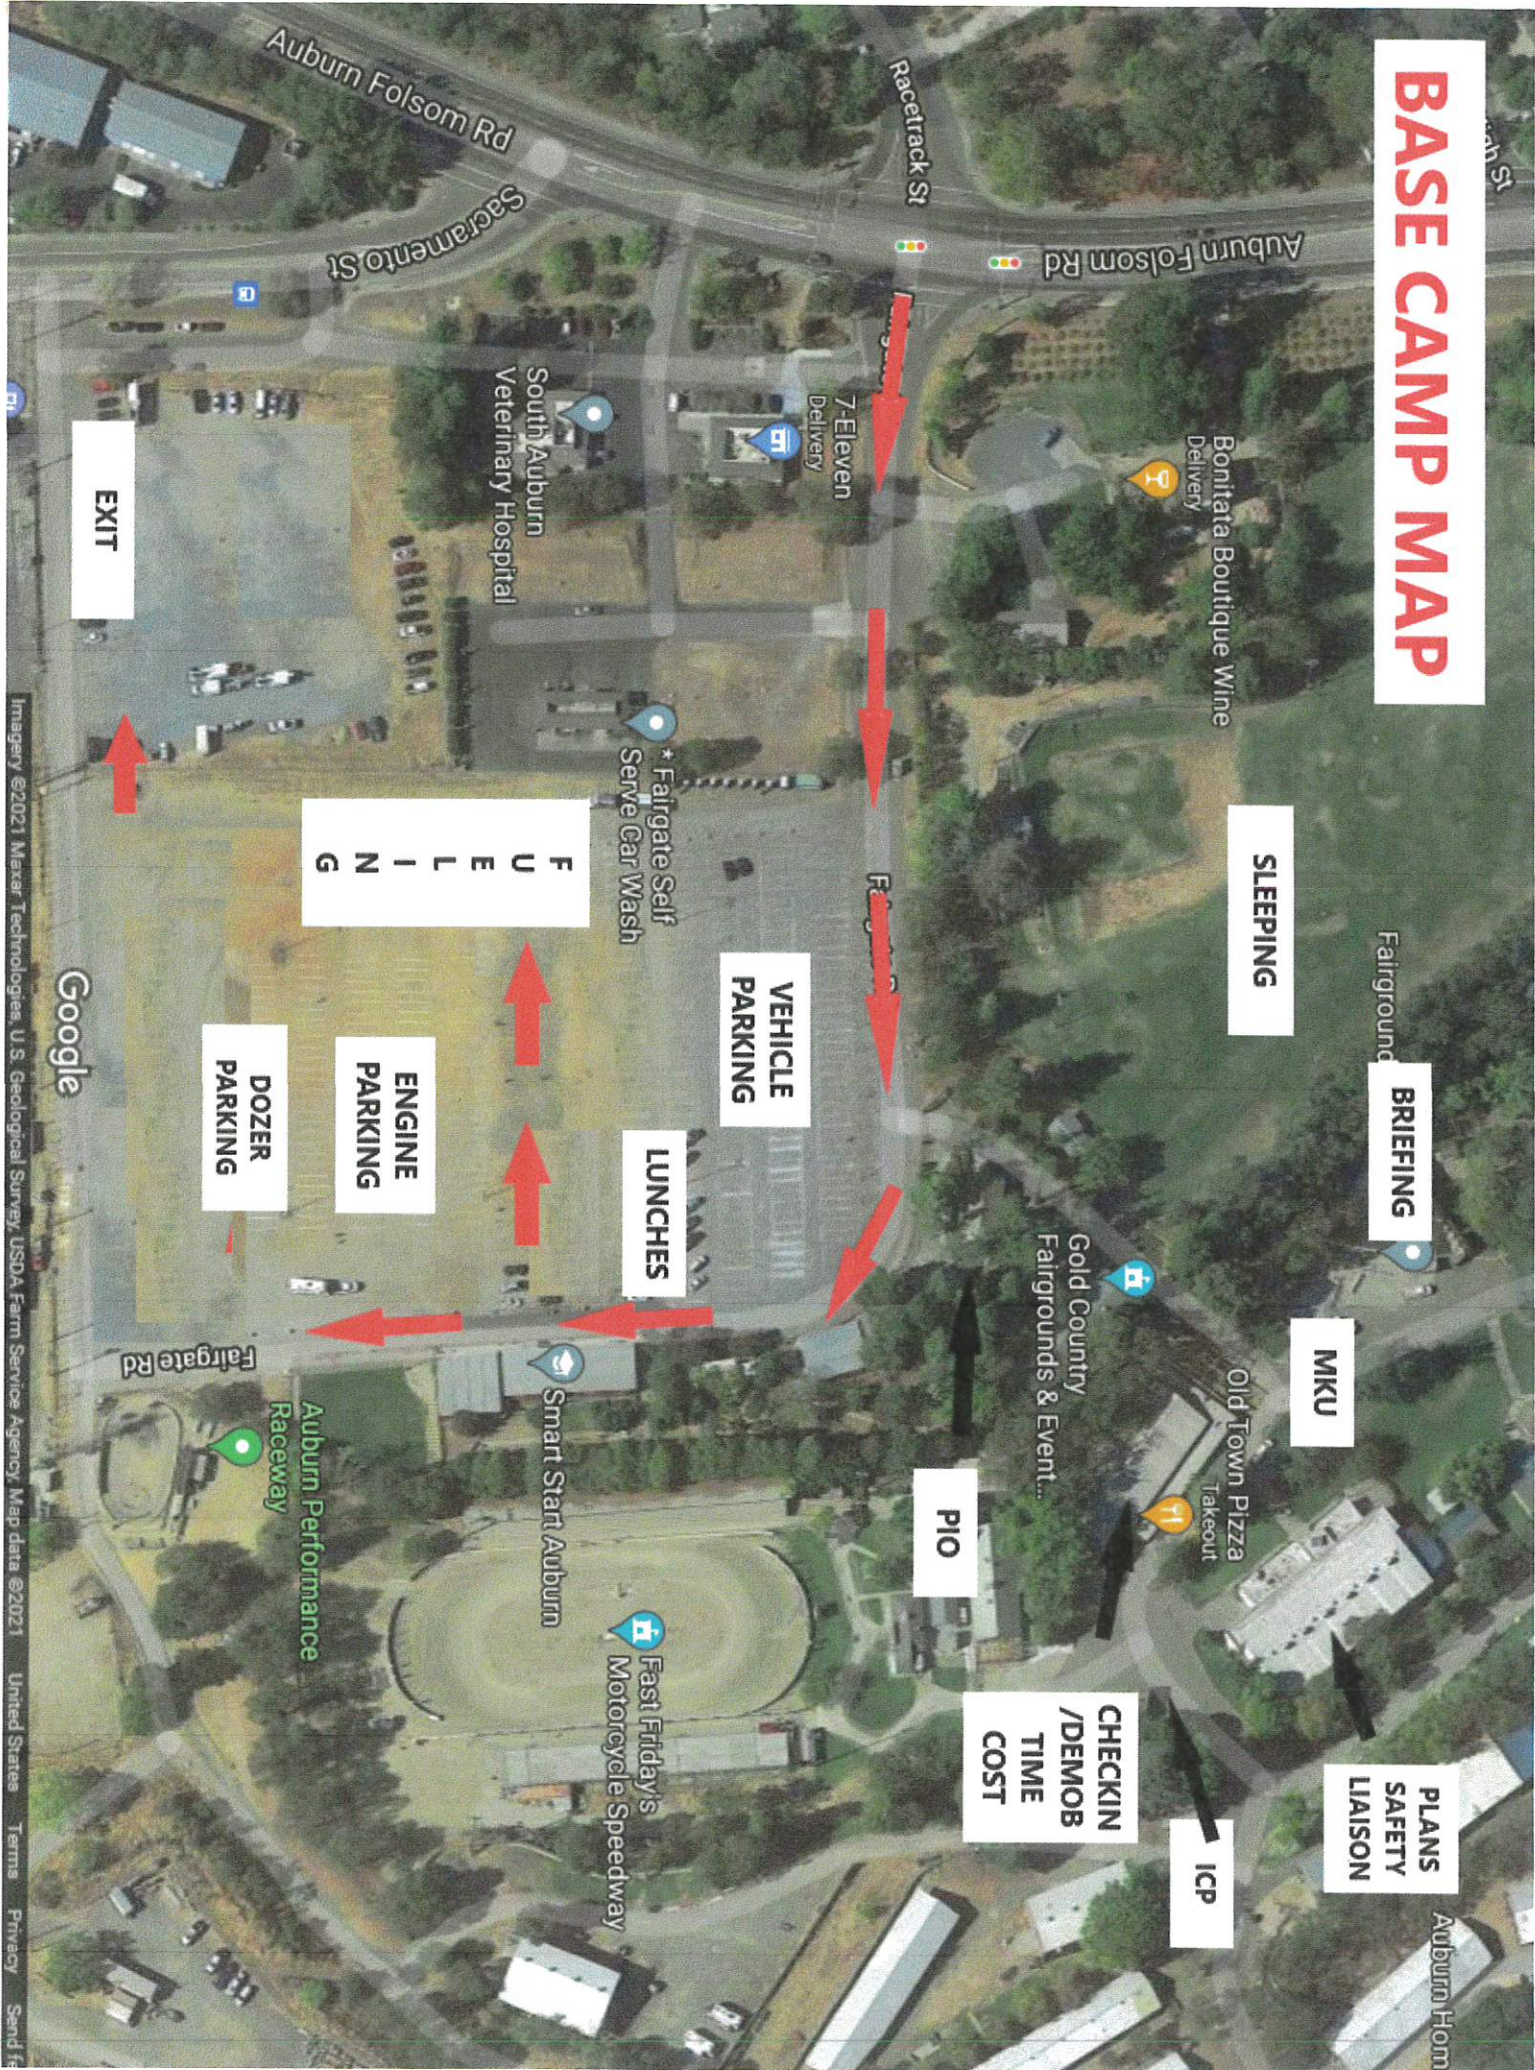

• Fireline and Road Gradient (%):	<u>0-10</u>	<u>11-25</u>	<u>26-50*</u>	<u>>50*</u>
Fireline waterbreak spacing	150'	100	75'-50'	50'-25'
Road waterbreak spacing	150'	100	75'-50'	N/A'
